BS, Computer Science, *Honours* July 2024
National University of Singapore; Singapore

- Relevant Coursework: System Design, Computer Networks, AI & ML, UIUX
- President, NUS Students' Computing Club (2022)

WORK EXPERIENCE

Eye-share; Norway & Singapore August 2022 to August 2026
Senior Technical Consultant

- Supported enterprise sales pursuits through pre-sales consulting, translating prospective client needs into tailored solutions and helping convert opportunities into new business.
- Built an AI-assisted client onboarding playbook and rulebook, adopted by the team as the standard process for onboarding every new enterprise account.
- Shaped Eye-share's Asia expansion as one of its first five Singapore employees, adapting SLAs and service models to regional client expectations and enabling smoother enterprise onboarding across Asia.
- Advised C-suite stakeholders across Norway, Greece, and Hong Kong on business and technology priorities, translating client needs into product and solution roadmaps and building a pipeline of 3+ follow-on projects.
- Led end-to-end delivery of three cross-border enterprise implementations, coordinating product, QA, and client finance teams to define scope, prioritize requirements, and achieve on-time go-lives with 100% client retention.
- Identified and delivered process, automation, and systems improvements that reduced processing time by 80% and operating costs by 25%, while integrating with ERP systems like Oracle and SAP with Azure-based APIs to support 20,000+ monthly transactions.

Gigspresso; Singapore April 2025 to July 2026
Founder

- Built and launched a two-sided UGC marketplace connecting brands with micro-creators, owning product design, development, analytics, creator acquisition, growth, and marketplace operations from zero to one.
- Conducted 20+ user interviews to shape the MVP and go-to-market strategy, onboarding 15 creators and multiple brand partners, launching the platform's first live campaign, and iterating on user feedback to improve campaign engagement by 15%.

PROJECTS

CareCall AI | Python, Guava AI Sep 2026

- Built a voice AI agent using Guava AI to automate patient follow-up calls and standardized post-care assessments, developed at a Boston AI Week hackathon.

CarCare | React, AWS (S3, EC2, DynamoDB, Lambda) Apr 2024

- Developed and deployed a machine-learning model to predict Singapore COE prices using historical bidding data, building the front end in React and deploying infrastructure across AWS services.
